

Press Release, for immediate publication

ITI Neovision, a leading Polish DTH Operator has selected the new NEOTION CI Plus CONAX Module to boost their HD Pay TV bouquet.

Aubagne, France & Warsaw, Poland – 2010, 6th December – NEOTION, a French based provider of highly-sophisticated processors (SoC) and Advanced CI & CI Plus Modules for Pay TV operators' has been selected by ITI Neovision, a leading Polish DTH Pay TV operator as their exclusive supplier of CI Plus CONAX Modules, for their HD satellite bouquet in Poland.

The NEOTION CI Plus CONAX Chipset Pairing Modules will allow customers to receive the ITI Neovision Pay TV bouquet directly through a Digital Satellite (S2) TV without the need for a Set Top-Box or to be used in a legacy DVB-CI or CI Plus HD digital DVB-S & S2 receiver.

The NEOTION Conditional Access Modules are designed using the latest NEOTION secure processor. The NKE1 processor is the second NEOTION chipset which has been assessed by CONAX as "CONAX STB Security Level 5", being the highest security level currently available for the CAM market. The new CI Plus Conditional Access Modules fulfil all standards as required by CI Plus, Pay Tv Operators and CA providers to ensure optimised protection and delivery of HD content.

"Following indepth research and evaluations, we have selected Neotion as a Conditional Access Module supplier due to their expertise within the secured CA Module market and as a existing supplier of quality CI Plus secure modules to others major Pay TV operators. As CI Plus IDTV's become available on the Polish market our aim is to provide the consumer with the latest complimentary technology for easy access to our HD bouquet and Conditional Access Modules provide an efficient and economic solution." said Artur Przybysz from ITI Neovision.

"We are very pleased that ITI Neovision has selected NEOTION as an official supplier of Conditional Access Modules for their Polish HD Bouquet. Our Conditional Access Modules are simply inserted into the latest CI Plus flat screen televisions without the need for any cable connections. Due to their simple "Insert & Play" nature CAM's are fast becoming the alternative solution to Set Top Boxes by providing the consumer with a functional and affordable solution operated through the existing single TV remote control. We are very proud to be able to offer IT Neovision's customers a secure, efficient and innovative product" said Gregory WIECZOREK, President & Director General, NEOTION.

These CA Modules which provide an access to ITI Neovision satellite Pay TV HD channels packages will be commercially deployed by distributors within the next days in Poland.

About Platform 'n'

Platform 'n' is Poland's new-generation pay-tv platform. It was launched October 12, 2006 and is owned by ITI Neovision, a subsidiary of TVN Group, one of Poland's leading media and entertainment groups. The platform is the first in Poland to include high definition channels and digital entertainment services broadcasting with MPEG4 compression. New and unique services launched in 2008 included remote programming of the 'n' box through the internet or mobile phone, an online customer care center and other novel services. Platform 'n' now has over 739,000 subscribers.
